***Education--**I support education funding reform. We need legislation like HB 750 that equitably and sustainably funds our schools through income tax increases for those most able to pay, corporate tax increases, a sales tax on non-taxed consumer services while giving property tax relief.

***Mass Transit--**Investing in mass transit improvements and expansion conserves energy, supplies jobs and is a resource, even a lifeline for the entire community, not just for those of a certain age group or economic status.

***Sensible Health Care--**
I support HB 311 to bring universal healthcare for all Illinois residents. The state can control costs with a sensible public health policy. We must halt vaccine mandates that promote chronic illness, even cause irreparable harm to our children.

—No more exemptions for vaccines with mercury—like flu, meningitis & tetanus vaccines—

—No vaccine mandates for diseases that are not casually contracted !

—More information for parents so they can truly have informed consent!

***Phase Out Nuclear Power--**
Can we ever really prepare ourselves for a Nuclear Accident?

Using the government's own prediction models, Physicians for Social Responsibility estimates that thousands would be killed, 200,000 would get sick, and 6.5 million people would have to be evacuated if there were a nuclear plant accident near Chicago.

Stop the insanity! Instead of lifting the moratorium on building new nuclear power plants, we need to phase out this dangerous source of energy and replace it with cheaper and benign, renewable sources.

Rita is a teacher & lives in Berwyn. She is endorsed by The Independent Voters of IL

Paid for by Citizens to Elect Rita Maniotis
